

105A HIGH RISE DRAIN ELBOW

Lightweight, compact drain elbow for high-rise application.

The new Model 105A High-Rise Elbow is lightweight and compact with an integrated Model 114 drain valve to help relieve pressure from your current high-rise set up. It features a standard NH thread and knurled edge coupling for tight Class 1 or Class 3 hose cabinets. The 45-degree elbow all but eliminates hose kinking from the standpipe valve.

Design Features:

- Compact design for high-rise applications
- Elbow design reduces hose kinks
- Increased flow efficiency
- Integrated Model 114 drain valve for ease-of-operations
- Elbow drains efficiently from any position
- Lightweight cast 356 Elk-O-Lite® aluminum construction

Mechanical Features:

- 45° Drain Elbow
- 2½" NH Female Free Swivel
- 2½" NH Male Discharge
- 200 psi Operating Pressure
- Weight of only 2 lbs.
