

EXTENDER[®]

Increased Range and Versatility for Vulcan and Comparable Monitors

Innovative firefighting products from Elkhart Brass have led the industry in safety, versatility, and performance for more than a century. Our newest extension product, the electrically actuated Extender is now available specifically for Vulcan, Vulcan RF and other compact Elkhart Brass monitors. When in full extended position, Extender adds 18 inches of height to Vulcan family monitors for outstanding range and exceptional versatility. It's a high performance combination that creates a remarkably responsive and multifaceted firefighting tool.

Electrically actuated Extender® -

another great innovation in firefighter safety and convenience from Elkhart Brass.

Extender features include -

- 18" extension for Vulcan and comparable monitors - increases versatility and range for our family of compact monitors
- Electric actuator rated at a 2500 pound static load for optimum strength
- Water flows through Extender in full up and full down position - lets you use compact monitors in a wider variety of firefighting situations
- Push button panel mount control - quick, easy operation
- An in-cab warning lamp lets you know at a glance if Extender is not fully retracted
- Pressure switch - will not allow Extender to move when internal pressure exceeds 10 psi; prevents damage to equipment or injury to personnel caused by unexpected changes in stream elevation
- Designed for use with - monitor and nozzle flow at 1250 GPM maximum with 100 psi nozzle pressure; maximum inlet pressure rating is 200 PSI
- Rapid deployment: approximately ten seconds - when every second counts, Extender is ready when you are
- Compact design - Extender uses very minimal apparatus space

The complete Extender package includes everything you need for installation. Choose from a variety of fasteners to wire harnesses in lengths from 5 to 40 feet.

Extender shown in fully retracted and fully extended positions.
